WORK EXPERIENCE

09/2010 - Present

Web developer

Rimontgó, Gran Vía Marqués del Turia, 62, Valencia (Spain).

www.rimontgo.com

- Development, analysis and documentation of the property management software Renew
 - I form part of a team whose responsibilities included developing Renew, a web tool created using technology such as HTML, CSS, PHP, AJAX, Javascript/JQuery and MySQL.
The aim of this management software is to combine all the tools and facilitate the management of the aspects involved in the real estate sector, such as recording client and property data, generating dynamic PDF or HTML reports, making statistics with APIs (Google Analytics), synchronizing properties with the websites of Rimontgó, EREN and many more.
We have developed Javascript/JQuery code showing search results, detecting and warning the user about some mistake entering data, modifying DOM (adding, removing and updating elements). Also we have created some JQuery Plugins such as a special pagination plugin or used others (JQuery UI, JCrop, TinyMCE, FullCalendar, Fancybox, etc.).
 - Our property management software Renew has been internationally recognized, winning
 - 'Most innovative 2012' by Luxury Real Estate.
- Development and analysis of web pages in different languages.
 - I belong to a team whose responsibilities include developing and updating the Rimontgó and the EREN websites in six and five languages (Spanish, English, German, French, Italian and Russian), using web technologies such as HTML, CSS, PHP, AJAX, Javascript/JQuery and MySQL. I also contributed in optimizing the SEO strategy which our team follows in order to improve the ranking of websites in search engines such as Google.
We developed on the websites Javascript /JQuery tools to allowing the user to arrange a visit to the property, sending forms to the agent, making a list of properties to compare, saving searches, programming email alerts when change some property data, viewing more photos, etc. In addition, the website updates his DOM with user interaction.
 - Rimontgó has received significant international recognition for its websites; during my time here as part of the team, the most notable included:
 - 'Best overall website 2010' by Leading Real Estate.
 - 'Website quality certification', for 2010, 2011, 2012, 2013 and 2014 by Leading Real Estate.
 - I have improved and created sections of EREN's extranet for the management and analysis, by the different member companies, of properties on this website, by also integrating tools such as the Google Analytics API.
 - Managing, updating and publishing articles in the blogs of Rimontgó and EREN using Wordpress in the six languages they use.
- Responding to user queries about the developed management software, doubts about the websites of Rimontgó and EREN, as well as technical issues.
- Assembly and maintenance of computer equipment.

EDUCATION AND TRAINING

- 2011 Systems engineering and informatics (Ingeniero Técnico Informatica Sistemas)
Specialising in systems and network administration
School of Engineering in Computer Science, Polytechnic University of Valencia

Additional Training

- 2008 Introduction to dynamic website programming with PHP and MySQL (30 hours).
Polytechnic University of Valencia
- 2009 AJAX programming with HTML, JavaScript and PHP (28 hours).
Polytechnic University of Valencia

OTHER SKILLS
