Work experience

09/2010 - 10/2014

Web developer

Rimontgó, Gran Vía Marqués del Turia, 62, Valencia (Spain). www.rimontgo.com

Duties

- Development, analysis and documentation of the property management software Renew
 - I was part of the team whose responsibilities included developing Renew, a web tool created using technology such as HTML, CSS, PHP, AJAX, Javascript, JQuery and MySQL.

The aim of this management software is to combine all the tools and facilitate the management of the aspects involved in the real estate sector, such as recording client and property data, generating dynamic PDF or HTML reports, making statistics with APIs (Google Analytics), synchronizing properties with the websites of Rimontgó, EREN and many more. In addition we designed and optimized the user interface of Renew, adding Javascript and JQuery code that allows the interaction between the user and the system and the instantaneous changes on the screen. Also we created some JQuery Plugins such as a special pagination plugin or used others like JQuery UI, JCrop, TinyMCE, FullCalendar or Fancybox.
 - Our property management software Renew was internationally recognized, winning
 - 'Most innovative 2012' by Luxury Real Estate.
- Development and analysis of web pages in different languages.
 - I belonged to the team whose responsibilities included developing and updating the Rimontgó and the EREN websites in six and five languages (Spanish, English, German, French, Italian and Russian), using web technologies such as HTML, CSS, PHP, AJAX, Javascript, JQuery and MySQL. I also contributed in optimizing the SEO strategy which the team followed in order to improve the ranking of websites in search engines such as Google.

We developed web tools with Javascript and JQuery in order to allow the user to arrange a visit to the property, sending forms to the agent, making a list of properties to compare, saving searches, programming email alerts when changing some property data, viewing more photos, etc. In addition, the website updates his DOM with user interaction.
 - Rimontgó has received significant international recognition for its websites; during my time there as part of the team, the most notable included:
 - 'Best overall website 2010' by Leading Real Estate.
 - 'Website quality certification', for 2010, 2011, 2012, 2013 and 2014 by Leading Real Estate.
 - I improved and created sections of EREN's extranet for the management and analysis, by the different member companies, of properties on this website, by also integrating tools such as the Google Analytics API.

- Managing, updating and publishing articles in the blogs of Rimontgó and EREN using Wordpress in the six languages they use.
- Responding to user queries about the developed management software, doubts about the websites of Rimontgó and EREN, as well as technical issues.
- Assembly and maintenance of computer equipment.

10/2014 - Present

Web developer

My personal website. www.christiangh.com

Duties

I'm developing my personal website in order to have my space on the internet while I learn and practice with new languages and frameworks. The structure of my website is programmed with PHP, using Symfony 2. Furthermore, I normally use the latest technologies such as the new labels and properties of HTML5 and CSS3, or powerful frameworks like JQuery and AngularJS to optimize the Javascript code.

Education and training

2011

Technical Engineering in Computer Systems Degree (Ingeniería Técnica en Informática de Sistemas). Specialized in systems and network administration
School of Informatics, Polytechnic University of Valencia.

Additional training

2008

Introduction to dynamic website programming with PHP and MySQL (30 hours).
School of Informatics, Polytechnic University of Valencia.

2009

AJAX programming with HTML, JavaScript and PHP (28 hours).
School of Informatics, Polytechnic University of Valencia.

Language skills

Mother tongue

Spanish

Other languages

English: **Intermediate**

Catalan: **Advanced**

Computer skills

Programming languages

HTML5, XML, PHP, CSS3, Javascript, Java, C++, C#, Template languages (Smarty, Twig)

Frameworks

JQuery, AngularJS, Wordpress, Symfony 2

Database

MySQL

Tools

PHP Designer, Adobe Dream Weaver, Blue J, Adobe Photoshop, Adobe Illustrator

Operating Systems

Windows, Linux

Interests

I'm interested in posts about web development and new technologies, cosmology, music and sports. I worked as a football coach in my region, training teams of children while organising activities to encourage group participation which served as an introduction to the sport

Referee

Ignacio Artagoitia. IT, Systems and Web Manager at Rimontgó: it@rimontgo.es
